### HOW TO REPLY TO THIS NOTICE:

#### I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.**

The Patent Term Adjustment to date is 1190 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 1190 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. ***Examiner's Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

Referring to claims 1-15, the prior art searched and of record neither anticipates nor suggests in the claimed combination, a video encoder with a reference picture weighting factor unit responsive to a frame difference and coupled to a reference picture weighting applicator for assigning a weighting factor corresponding to a reference picture.

Referring to claims 16-28, the prior art searched and of record neither anticipates nor suggests in the claimed combination, method for encoding video data of a substantially uncompressed image block by assigning a weighting factor determined by frame differences for the image block corresponding to a particular reference picture, motion compensating the particular reference picture based on motion vectors computed from a difference with the image block, adjusting the motion compensated reference picture by the assigned weighting factor, subtracting the resulting weighted motion compensated reference picture from the substantially uncompressed image block, and encoding a signal indicative of the resulting difference along with the corresponding index of the particular reference picture.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Examiner's Remarks***

Upon review of the documents cited in the EPO search report, the claims are not anticipated or suggested by the prior art cited. In particular, it is noted that Lavagetto (EP 0511778 A2) is producing from an applied video signal of multiple frames a block of pels to be encoded contained in a frame being interpolated in a motion interpolation system by developing a set of motion vector displacements and weights from two reference frames of the video signal to minimize interpolation error. Lavagetto does not anticipate or suggest a weighting factor unit responsive to a frame difference and coupled to a reference picture weighting applicator for assigning a weighting factor corresponding to a reference picture, nor the method for encoding video data as claimed by applicant. Moreover, it is not seen how Fukuda (JP 2000-106675) or Yoneyama et al anticipate or suggest the video encoder or method claimed.

Jeon (US 2005/0129126 A1) found the examiner's search discloses predicting an a current image block using first and second image blocks, and temporal information for a current picture and at least one reference picture related to one of the first and second image blocks. The current image block is predicted based on a first function and a second function, the first function being a function of a first weight and the first image block, and the second function being a function of a second weight and the second image block, the first weight being a function of a temporal difference between the current picture and the reference picture, and the second weight being a function of the first weight. So the current image block prediction is based on a weighted combination of the first and second image blocks where a weight applied to one of the first and

Art Unit: 2625

second image blocks is based on the temporal difference between the current picture and the reference picture. This is different than the reference picture weighting factor assignment in response to a frame difference that applicant is claiming
